

Bottle thickness solutions from the leader in precision measurement.

Update your quality testing
capabilities with automated
precision bottle & preform
measurement solutions.

Introducing ITES ITES combines precise plastic bottle measurement capability with flexible application and a simple user interface. Equipped with an optional automatic loading system - ITES-C - the system further enhances testing productivity with 'load-and-go' operation.

If your lab continues to rely on manual testing methods, or your legacy thickness system is no longer meeting your needs, contact AVID to discuss a supported up-to-date solution.

Automated AVID solutions include:

Precision Dimensional Measurement | Bottle Thickness
Preform Thickness | Capacity Measurement | Defect Detection
Laboratory Solutions | Online-inline Inspection
